# PCW Objectives Outlook

---

## Spring 2012 Updates

---

### **ENVIRONMENTAL Technical Advisory Group Meeting 4/25/12**

25 people participated

Main themes of comments:

- Look at existing and future threats and influencing factors – toxics, climate and land use
- Include non-commercial or non-traditional species, especially benthic
- Compare project area conditions to other areas
- Look more at trends

## Spring 2012 Updates

---

### Program Evaluation by Walker Consulting (students), 3/2012

11 interviews with current or past members

Summary of preliminary results:

- Project is a good idea
- There is a diverse set of people and skills here
- Goals have been unclear
- Participants would like to see more action, progress and engagement with one another

*The evaluators intend to conduct additional interviews by phone or email, and develop a final report this summer.*
